A SHORT HISTORY OF THE COVERED RINK

The students at the University of Alberta are feeling more than a little proud of themselves these days for their covered rink is about to be opened. It is considerable of an achievement for a student body of eight hundred odd to initiate and carry through a project costing in the neighborhood of twenty-five thousand dollars. Yet this has been done, the structure on the corner of 87th avenue and 113th street, is the result. And hereby hangs a tale—in other words, the rink has a history.

One needs to turn back the pages of university history to the term of 1924-25 to find the begin-

A SHORT HISTORY

(Continued)

nings. Mark Levey, then president of the Students' Union, was the first to take active measures toward the erection of a students' rink, a matter that had received some little discussion previously. A covered rink committee consisting of:

The President of the University; Dr. W. G. Hardy, permanent chairman; Mr. A. West, bursar; president of the Students' Union; president of the Men's Athletic Association; secretary of the Students' Union; was appointed.

To raise the money necessary, it was decided to borrow. This was done with the aid of the president of the university and the board of governors. The provincial government consented to loan the

A SHORT HISTORY

(Continued)

Students' Union twenty thousand dollars, this to be repaid out of money secured by increasing Students' Union fees \$3.00 per student. So that each student will pay \$3.00 a year until the loan is retired. The government stipulated that as an evidence of good faith the students secure five thousand dollars before the loan be granted. This sum was collected by subscription, the citizens of Edmonton and the province at large responding readily to the students' appeal.

Every effort was made to build in 1926. Plans were drawn up, the truss span being the cause of considerable trouble. The committee desired to have the span reach

from side to side without the necessity of supporting posts within the building to obstruct the view. A steel truss was originally designed and approved, but owing to the difficulty in securing building plans satisfactory in every detail, building was postponed until the summer of this year.

This year a wooden truss was designed by Professor Burgess and judged satisfactory. The contract for the building was let to W. A. Brown and Sons.

The student rink, with an ice surface of 190 by 80 feet and seating roughly 2,000 people, is the result.

WHO IS THE FASTEST PUCK CHASER IN THE SENIOR LEAGUE ?

Edmonton Journal Arranges Competition

Handsome Watch for the Winner

Arguments as to the fastest puck carrier in the Senior Hockey League which develop each succeeding season, will probably be as warm this year as heretofore, but backers of different athletes will at least have something definite to base their claims on. The Journal has arranged a competition for the speedsters in the senior league teams, and the athlete who makes the best time will be the recipient of a handsome watch suitably engraved, which will be presented at the end of the season, probably during the playoffs.

WHO IS THE FASTEST PUCK CHASER IN THE SENIOR LEAGUE ?

(Continued from Preceding Page)

Conditions will be something as follows:

The races will be held in the intermissions between the periods, and the players will compete in pairs.

The distance will be two turns around the rink, barrels being set at the corners to mark the course.

Each set of competitors will toss for position and the athlete naming the right side of the coin will be given his choice of "track", and the puck placed on the blue line in the position he desires. His rival will have to take any other position that is left.

Each athlete has the privilege of making three attempts during the season between dates to be set by the committee in charge of the races.

Six of the city's best timers will be on hand to time the athletes in all their starts, and at the end of the season the athlete with the best mark will win the prize.
